

## **Health System Updates for Better Service: Thank You for Your Patience!**

CMCO is updating our Electronic Health Records System to one comprehensive system that offers registration, scheduling, billing, and easy health record access. This technology, powered by EPIC software, is also used by our local hospitals and will be both familiar and convenient for our patients offering increased access and improved communications.

All patients will be re-registered at their next visit, so they can take advantage of this tremendous technology. Please plan to provide us with the following:

- Photo ID
- Insurance Card
- Updated Consent Forms

We appreciate your patience as we update and upgrade our systems. If you'd like to learn more about Epic software, or perhaps to learn where MyChart technology is utilized throughout our area, feel free to visit the Epic website <https://www.epic.com/software> today.

Thank You!  
The CMCO Team
